

The Alphabet Tree

Cut out the leaves, find each letter, and glue it onto the tree.

How to use this

A cut, match, and glue page for learning letters, with fall leaves.

● HOW WE USE IT

Print a tree and a page of leaves. Your child cuts out the leaves, finds the matching letter on the tree, and glues the leaf on top. As each leaf goes on, say the letter name and the sound it makes. Singing the alphabet song while you hunt for the next one helps too.

● FOUR WAYS TO PLAY

- 1 **Big letters.** Glue the uppercase leaves onto the uppercase tree.
- 2 **Little letters.** Glue the lowercase leaves onto the lowercase tree.
- 3 **Big and little.** Ready for more? Put the lowercase leaves on the uppercase tree, so a matches A.
- 4 **Play it again.** Skip the glue, keep the leaves in an envelope, and match them on the tree another day.

● GATHER

Scissors and a glue stick. Cardstock holds up better for the leaves, but plain paper works fine.

● FOR SMALL HANDS

Twenty-six leaves is a lot of cutting. Cut a row together each day, or you cut and they match. Both count.

● SPARE LEAVES

Each leaf page has four blank leaves at the bottom. Use them if a leaf gets lost, or let your child write their own letters, like the ones in their name.

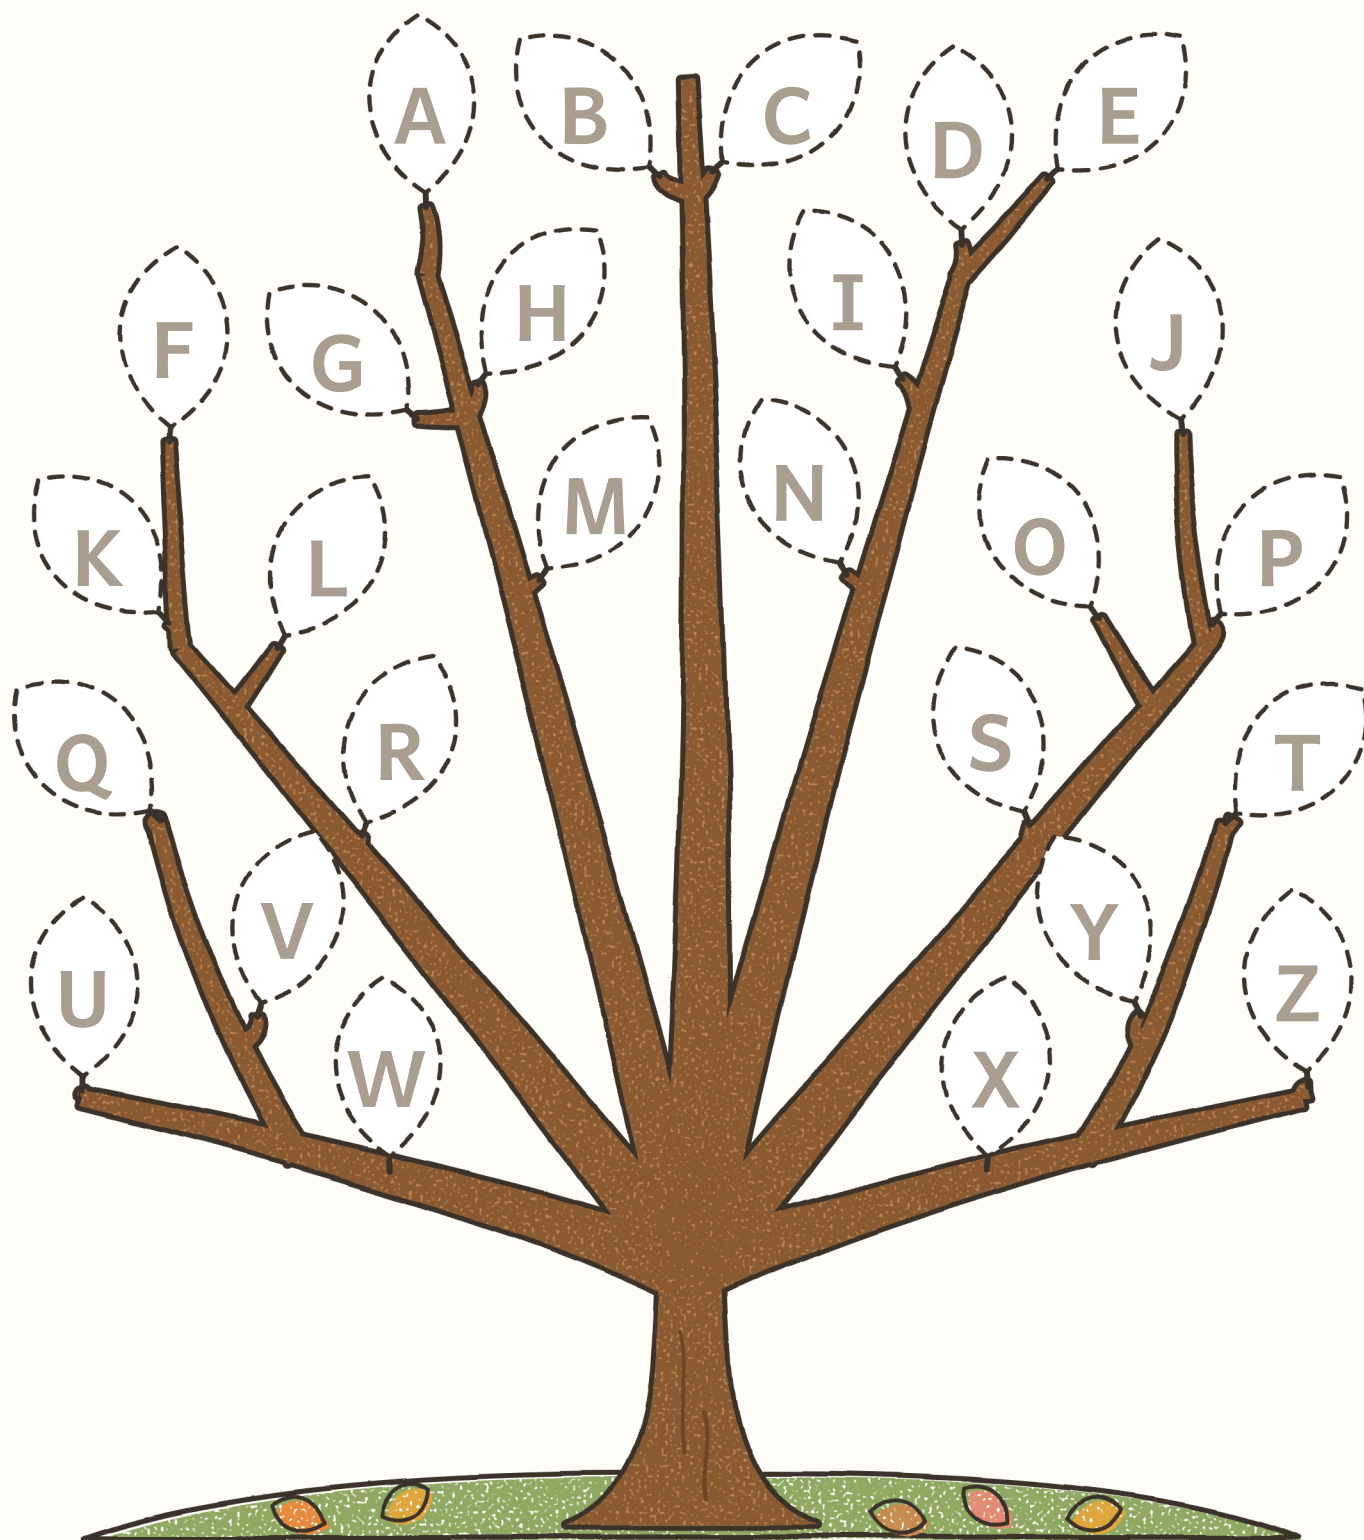

Spend some time outside observing nature. Bring home a few real leaves and talk about the letter each tree starts with, like O for oak.

The Uppercase Tree

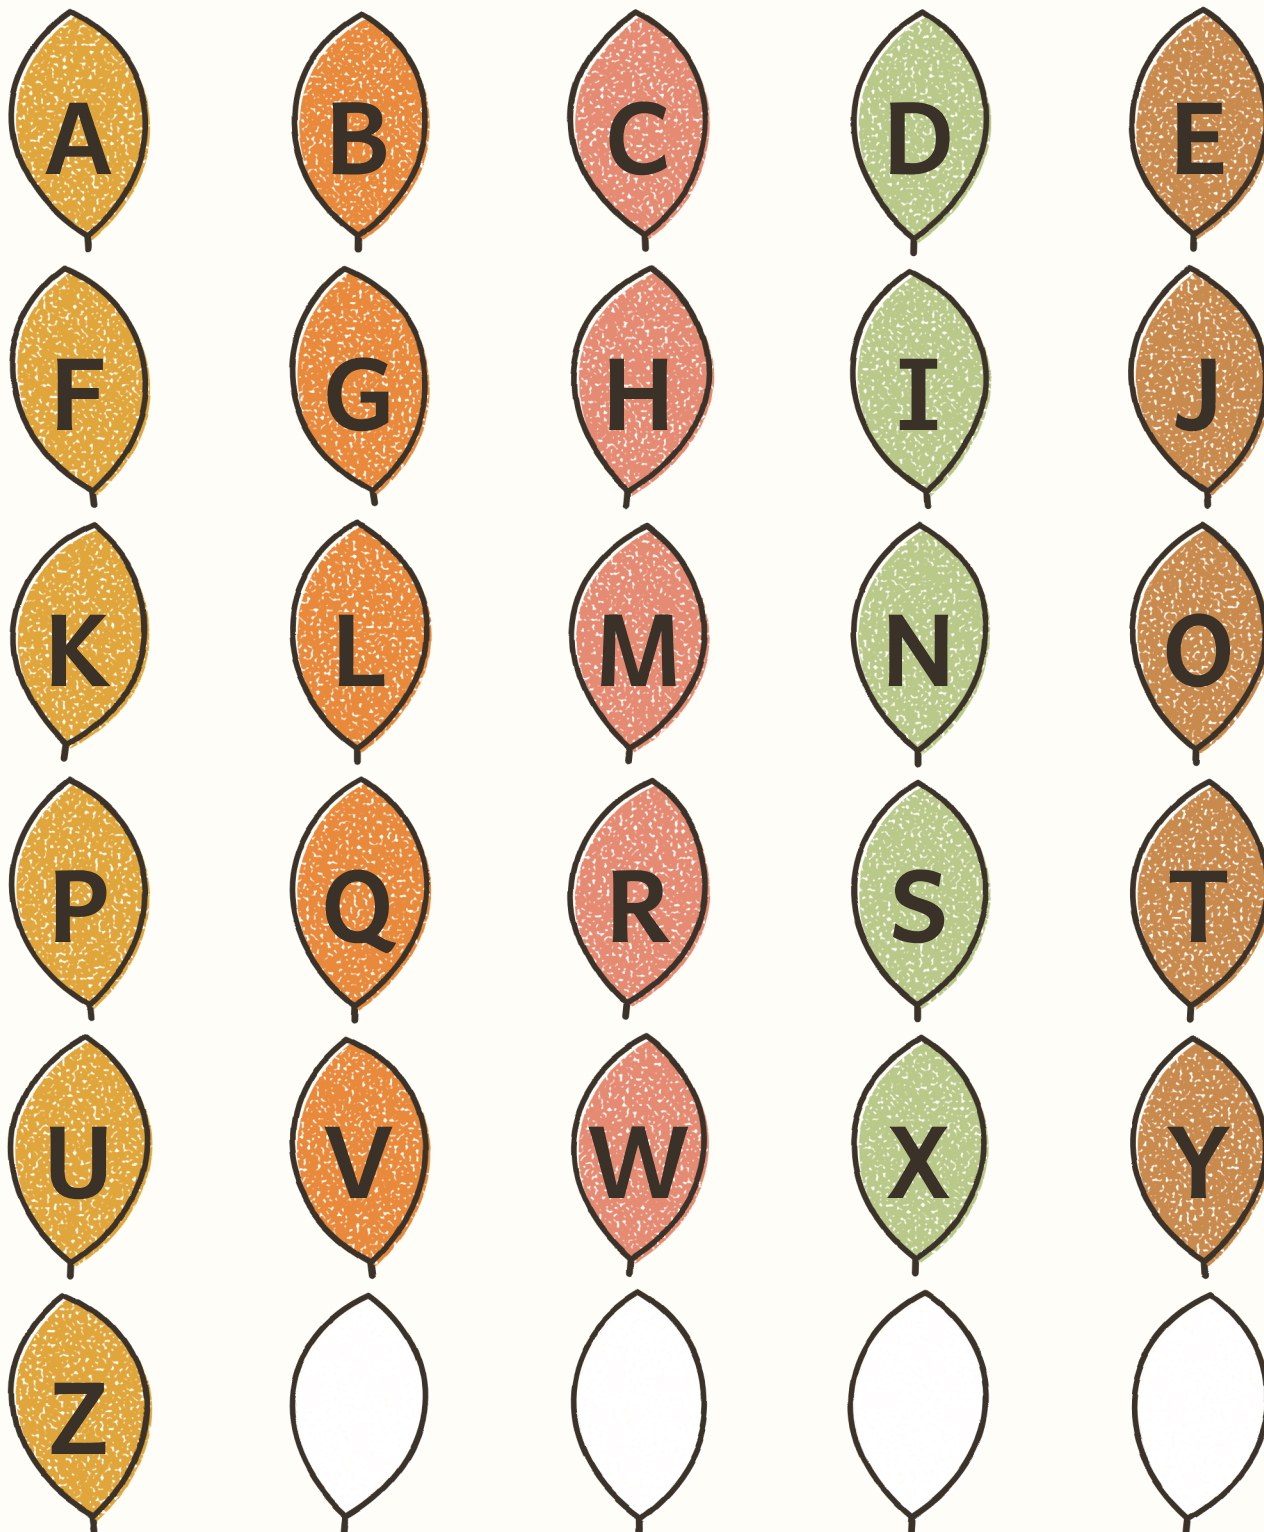

Find the leaf with the same letter and glue it on top. Say each letter as it goes on.

Uppercase Leaves

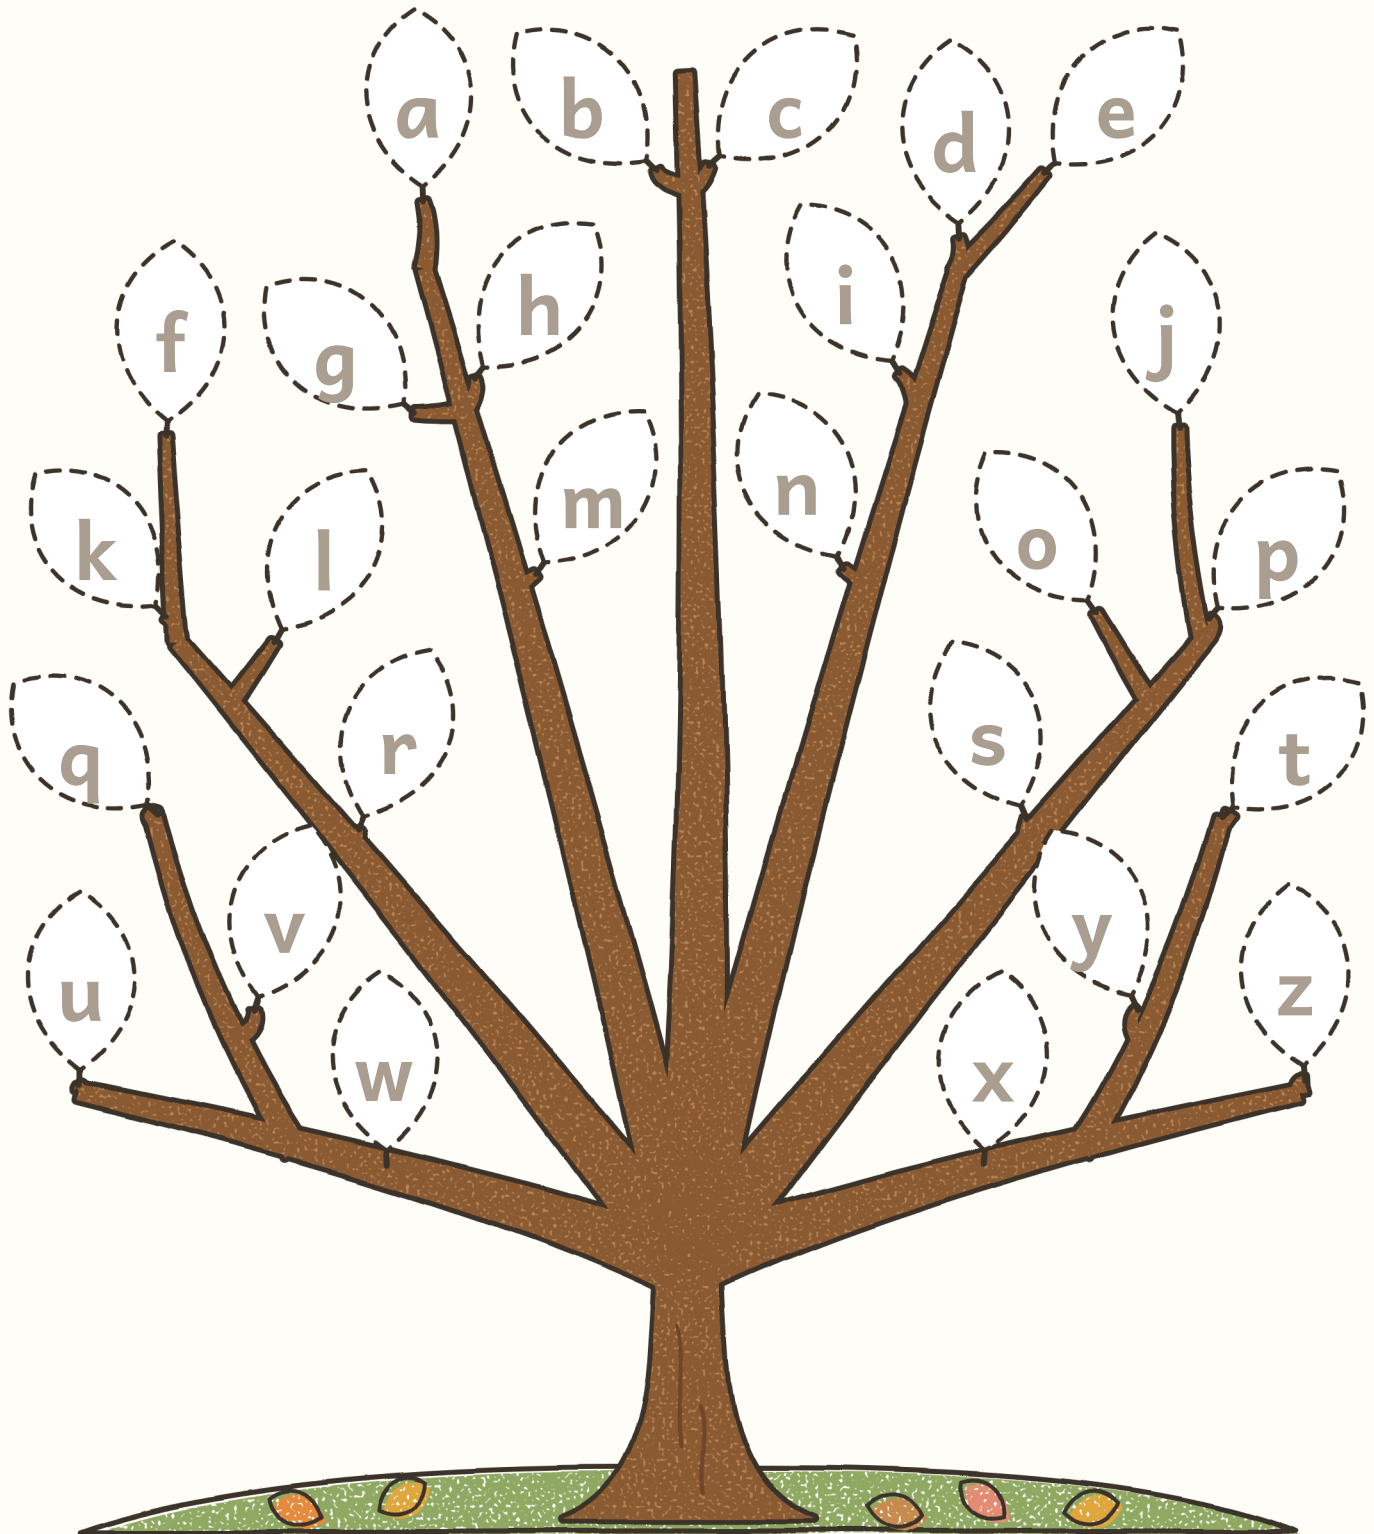

Cut out each leaf on its outside line. Then match it to the Uppercase Tree.

The Lowercase Tree

Find the leaf with the same letter and glue it on top. Say each letter as it goes on.

Lowercase Leaves

Cut out each leaf on its outside line. Then match it to the Lowercase Tree.
